

ElasticM2M
Enabling Connected Businesses

Elastic M2M, Inc.

Our company develops cutting edge software technology and has delivered a powerful cloud platform to rapidly launch applications for the fast growing Internet of Things (IoT) and Machine 2 Machine (M2M) markets (connecting sensors and actuators to the cloud). We have accelerated the launch of over twenty B2B and B2C brands providing both web and mobile connected applications for markets including automotive, commercial fleets, transportation (containers, trailers, chassis) warehouse, inland marine, power sports, waste trucks and supply chain. The platform supports 900,000 connected assets, processes over ½ billion telemetry events a month and we have sold over ½ million consumer subscriptions. The Elastic team are veterans from Cisco Systems, IBM, Lockheed Martin and multiple IoT companies. We are building what will be a premier technology company in this high-growth industry, with a collaborative culture to match.
